Hugh Hefner (April 9, 1926 – September 27, 2017) was an American magazine publisher, editor and the creator of Playboy, founded in 1953. Playboy magazine became the centerfold for nude models. Hefner was also known for his large estate called the Playboy Mansion. While some celebrated his support for civil and gay rights in the repressive '50s, others decried his publication and lifestyle as sexist. Post your favorite Hef pic to this Collective?
