Ozzy Osbourne, legendary frontman of Black Sabbath and icon of heavy metal, died on July 22, 2025, at age 76. Known as the "Prince of Darkness," he helped define a genre—and once infamously bit the head off a bat on stage. His solo career soared, and his family's MTV show *The Osbournes* made him a reality TV star. Wild, raw, and enduring, he was a one-of-a-kind force in music and pop culture.
